 andrebrandao.dev  Belo Horizonte, Brazil
 Portuguese (native) • English (professional)

PROFILE

Platform and backend engineer who ships end-to-end, from AWS and Terraform at work to a declarative NixOS + Proxmox homelab at home. Full Stack Developer at A3Data, leading A3Copilots, an internal AI platform that exposes company systems to agents through MCP servers. Co-founded Crossgeo, where I built a beverage distributor’s management system and a last-mile delivery platform, both in production. B.Sc. in Computer Science, PUC-MG (2026).

SKILLS

Languages Backend	TypeScript, Python, Go, C, Java, Rust, Bash REST / gRPC APIs, microservices, event-driven (SQS, EventBridge, DynamoDB Streams), ECS, Lambda, RDS, DynamoDB, S3, CloudFront
Infra	AWS, Cloudflare, Terraform, Pulumi/SST, Backstage, Docker, Proxmox, GitHub Actions, Vault, IAM, Linux, Nix / NixOS, Git, SOPS
Data	PostgreSQL, SQLite, Redis, SQL, NoSQL, Airflow, Spark
Observability	OpenTelemetry, Prometheus / Grafana, distributed tracing
AI & LLMs	Amazon (Bedrock/AgentCore), multi-agent systems, MCP servers, Langchain

EXPERIENCE

Full Stack Developer *A3Data — Belo Horizonte, Brazil* 06/2026 – Present

- Lead developer of **A3Copilots**, an internal AI platform that connects company systems (Pipedrive CRM, Google Drive, AWS Partner Network, Backstage catalog) to agents through MCP servers with role-based access control, so each agent only sees the data its user is allowed to.
- Designed the project structure and built the CI/CD and infrastructure from scratch, including ephemeral preview environments per pull request so every change is reviewed on a live deployment before merge.
- *Stack*: TypeScript, Node, MCP, Backstage, Terraform, AWS, GitHub Actions.

ML Engineer Intern *A3Data — Belo Horizonte, Brazil* 03/2025 – 06/2026

- Implemented the observability layer for Grupo Elfa’s multi-agent quotation system on Amazon Bedrock AgentCore, the first AgentCore production deployment in Latin America: distributed tracing, business KPIs and dashboards via OpenTelemetry for 800k+ quotations per month. Featured in the AWS Brasil engineering blog.
- Built the internal developer platform on Backstage with a template engine for WhatsApp and web LLM agents, ETL pipelines (Airflow + Spark) and ML projects, each shipping with Terraform infra, deploy pipelines, monitoring and IAM.
- Provisioned and deployed production agents and services across AWS ECS, Lambda, DynamoDB (incl. Streams) and RDS entirely via Terraform.
- *Stack*: Python, Terraform, Backstage, OpenTelemetry, Airflow, Spark, AWS.

Full Stack Developer, Co-founder *Crossgeo — Belo Horizonte, Brazil* 06/2024 – 09/2026

- **Duarte Distribuidora**: management system in production at a beverage distributor, covering inventory, sales, customers and suppliers. Svelte, TypeScript, SQLite.
- **Rota 88 Delivery**: last-mile delivery platform in production. Ingests iFood and OpenDelivery orders via Lambda webhooks, runs the operator web app on ECS with WebSockets for live dispatch, and ships a React Native courier app with configurable auto-dispatch routing heuristics. Svelte, TypeScript, React Native, PostgreSQL on RDS, AWS.

Full Stack Developer *Crossvirus (PUC-MG startup) — Belo Horizonte, Brazil* 03/2024 – 2025

Built an epidemiological monitoring platform (Dengue, COVID-19) used by two cities in Minas Gerais and coordinated two interns. Astro, Svelte, PostgreSQL.

PROJECTS

Homelab — Nix / NixOS, Terraform, Proxmox, SOPS github.com/andre-brandao/nixos

Fully declarative infrastructure for my workstations (NixOS + home-manager) and a Proxmox homelab running Gitea, Vault, Prometheus, Grafana and an LLM gateway. Each host is a NixOS module with a matching Terraform stack; secrets via SOPS.

GPUi Shell — Rust, Wayland, D-Bus, IPC, Nix github.com/andre-brandao/gpui-shell

GPU-accelerated Wayland desktop shell in Rust on Zed’s GPUI framework. Replaces waybar, rofi and swaync with a single app for Hyprland and Niri.

CERTIFICATIONS

AWS Partner — Agentic AI Essentials • Generative AI (Technical) • Digital Sovereignty on AWS (Technical) • AWS Academy Graduate — Cloud Foundations.

EDUCATION

B.Sc. in Computer Science *PUC-MG, Belo Horizonte, Brazil* 2022 – 2026
